

FT: Registered Nurse-McDonald County Health Dept.

McDonald County is urgently hiring nurses to continue that level of dedication to the McDonald County Community! Our reputation is extremely important to us and we take pride in what we do. Our standards are high, business is stable and strong, we care about you, patients, and the community.

Nurses in these settings offer direct care and disseminate information, make referrals, and manage caseloads. In addition to the more traditional nursing duties — assessing health status and providing treatment — the perfect candidate needs to be knowledgeable of community resources and of the needs of the population served. They may encounter children who need screenings and services and parents who have no idea what is available or how to ask for it. Cultural competence is a must, and bilingualism is a plus. Public health nurses may also be a part of the infrastructure that responds to natural disasters to the area.
