General Business

Commission met with Dustin Johnson regarding environmental concerns in McDonald County.

Maria Poulides and Dr. Nan Palmer called the Commission regarding environmental concerns.

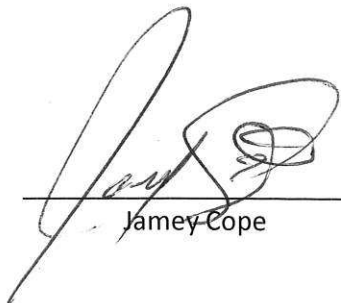

Camille Graves, Missouri Department of Natural Resources, met with the Commission. Graves told the Commission that, in her opinion, there is nothing McDonald County alone can do to require companies provide proof no harmful chemicals are in the substance being spread. She thought the best course of action would be to talk to other Missouri counties to see if more counties would want to come together to try to get something done.

Commission conducted general business of the county.
